

Super Expertise

The best technical team - exclusive to Bharat Hitech, man the plant and monitor the process, to blend the cement in just the required proportion, to make our product as "Engineers' Choice" - Bharat Super Cement, Bharat Hitech Cement, Bharat Max Strong Cement.

Rigorous testing of product at intermediate and final stages of production is done at our well equipped, Bureau of Indian Standard approved quality control laboratories by qualified and experienced chemists and others and all types of modern testing facilities along with modern laboratory equipments are available.

The renowned Scientist Dr. V K Mathur Msc Phd (Cement Chemistry) Ex GM (Testing, Standards and Quality Control) of National Council for Cement & Building Materials (NCCBM) New Delhi - is our Chief Quality Control Advisor. Prof. Jawahar Muherjee - Head of Civil Engineering Department of Purulia Polytechnic is our advisor who advises our beloved customers regarding proper mixing of cement in Civil construction jobs.

Super Strength

Bharat Hitech's Super Products are specially blended to give with compressive strength and consistency - Our products contain superlative properties and could be used extensively for various construction / Big Projects.

Super Benefits

- Due to fine quality, Super fine construction can be achieved
- It gives maximum strength of minimum use of cement
- Better water proofing is achieved due to low heat of hydration as the shrinkage will be less, which means less cracks
- Better finish due to fineness and hence better workability, thus plastering becomes easier
- Improved durability is achieved, the permeability reduces and the volumetric changes are also reduced
- Helps in shaping sleeker and more elegant structures, giving greater flexibility in new design concept
- Faster construction can be done as it achieve high early strength in just 24 hours.

Eco Friendly

Bharat Hitech has been doing its best to protect the environment and maintain the ecological balance in the area.

Appropriate pollution control equipment like Dust collectors have been installed in the plant.

Lot of afforestation measures have been taken and green belts are being developed.

Our Functional Departments

- Production, Planning & Scheduling
- R & D Department / Testing & Inspection (QC)
- Advertising & Sales Promotion
- Business, Development & Export
- HRD, Legal & Administration / Sales & Marketing
- Finance & Accounts
- Logistics & Commercial
- Procurement & Store
- IT & Networking

Our Supply Chains

- Easy & fast delivery in big projects and RMC plants.
- Loose cement in Bulker - cutting labour costs for unloading at sites.
- Supplying loose cement in Air tight containers, keep it fresh & moisture free.

Customer Care

To serve our valued customers and construction professional with suitable technical advice and support, we have a dedicated service cell TASC - Technical, Assistant and Service to Customers - for round the clock service.
